

GIVE TOYS THAT 'FIT!' Small Irrigation Projects Can Help During The Dry Spells

Child's Playthings Should Not Be Too Mature, Unwieldy

NEW YORK — "No matter what toy I buy for my little boy, he always wants it again. I just don't know what Junior wants!"

Melvin Frank, a toy advertising man for a major northern toy company, is not alone in this complaint to often be got to thinking about the recognized need to help youngsters with constructive playthings, fathers and gift-giving relatives are the right boys for the job. That was born the Toy Council, a national organization, to coordinate efforts to help children with toys that are not too mature, too expensive or too complicated to play with.

The council has asked toy designers, psychologists and other experts to help it select toys that are not too mature, too expensive or too complicated to play with.

These manufacturers, at intervals, send representatives to the council. From time to time, the representative hands a list of toys to be featured throughout the year.

Thus, the council helps toy makers know what the public wants, and which toys are the best for the child. The council also helps the public to know what toys are the best for the child. The council also helps the public to know what toys are the best for the child.

Many psychologists disagree on the best toys to give to children. The council, however, has a list of toys that are the best for the child. The council also helps the public to know what toys are the best for the child.

THOUGHT is the high hand in farming on the prairie and the conservation of moisture, largely through various cultural practices, is the main concern of the dry land farmer, says W. L. Lawrence, Dominion Experimental Station, Lethbridge.

Nothing can be done about the weather but one thing can, and that is to make the most of it. The farmer must be prepared to store and make use of it.

Handers have for many years made use of small irrigation projects to grow winter feed. In fact no cattleman could stay in business very long without this kind of feed source.

Water supply is usually the limiting factor in the case of small projects and usually little or no water is available for irrigation crops.

However, good production can be increased by the use of small projects. The farmer must be prepared to store and make use of it.

BRINGS "BROTHERHOOD OF MAN" TO CANADA—Harry Busnel, U.S. paratrooper who lost both his hands in the war, signs city hall book in Toronto today about Canada. With him are Gen. James, Sir Stewart

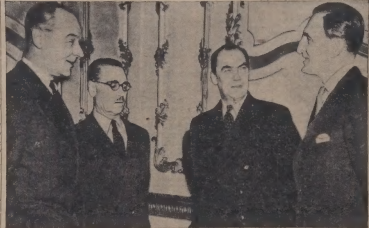

Flavelle, Dr. E. Hunter, L. Hermann, L. Simonsky, Dr. R. Jones, Dr. G. Niman, Dr. D. MacLennan, Hilda Fenberg and George Hodson of Canadian Council of Christians and Jews.—S.N.S. photo.

NATIONAL OBSERVANCE OF SCOUT-GUIDE WEEK—Scouts and Guides from Atlantic to Pacific took part in ceremonies marking the Canada-wide observance of Scout-Guide week. Girl Guide meetings usually conclude with games and songs around a portable camp fire when a real one is not available, as shown in the above picture.—S.N.S. photo.

SISTERS HAVE BABIES SAME DAY—Two sisters who had babies on the same day in North Vancouver General hospital are Mrs. Fay Maynard with Dennis, left, and Mrs. Ron Gibbs with daughter Constantine.

DISCUSSING AUSTRIAN TREATY—The foreign ministers' delegates (left to right) from Ender, U.S.; M. Barthelot, France; Barillon, Russia; and J. A. Marjoribanks, Britain, are shown as they met in London, Eng., to re-open discussions on the proposed Austrian treaty. The delegates are hopeful of agreement, as the stumbling block at the last conference was Russia's backing of Yugoslavia's claim to the Austrian province of Croatia. There is now a rift in the Slavo-Turk relations.—S.N.S. photo.

DRIVER CRITICALLY INJURED—When his truck was hit by a train at an Ottawa level crossing, Ernest Lohrey, shown in inset, was critically injured. His vehicle, seen beside the track, was almost completely wrecked. The truck was dragged about 10 feet by the train after collision.—S.N.S. photo.

CHILDREN'S PET—Honey Barber's 11th annual dog derby held recently with nearly 10,000 people watching the spectacle. In the dog derby, children were in the minority, with Collie, Samoyed, Great Dane and just plain dogs in the show traces. Here is the collie pet of Michael and Judy Price before the race.—S.N.S. photo.

"COFFEE KLATCH" IN JERUSALEM, ISRAEL—At the former Government House at Jerusalem, seat of all Palestine high commissions, before the mandate ended, the strange situation has arisen that soldiers of the Jewish army and the Arab Legion from Trans-Jordan stand on guard together. In this photo Major Laurence of Jerusalem, Belgium, in charge of the security at Government House, serves Turkish coffee to the guests. Jew and Arab Government House lies at present in no-man's land between the Jewish and Arab lines and serves as the base for the coalition command. While Jews guard the entrance from the Jewish side and Arabs the entrance from their side, on the grounds mixed guards are on patrol. Israel's first parliament in 2,000 years has opened deliberations in Jerusalem while the flag of the 42 nations that recognized the infant state fluttered from the city's tallest buildings.—S.N.S. photo.

FOOD FOR LIVESTOCK—Half-starved sheep await their first food in many days as trucks, left, unload bales of hay for the livestock of the Jersey Indians who have been cut off by heavy snowfall, from all communication with the outside for many weeks. This truck was the first to reach this isolated area from headquarters at the Hazy mountain school. A little girl looks on, perhaps enviously, as the sheep nibble at the bales.—S.N.S. photo.

INDIAN GIRL WAS BROWBEATEN—An incident of "browbeating" not had manners involving the departure of a 20-year-old Indian girl from her home in Windsor, Ont., without obtaining the full consent of her parents, was presented to Hon. Paul Martin, minister of health, at Ottawa. Bishop Henri Bellet, vice apostolic of James Bay, said, Bishop Bellet said that last October an Indian girl, Alexandra Hechington, who had previously been treated for tuberculosis at the Mount Sinai hospital, was told by a doctor of the Indian affairs department she would require further treatment. "The doctor failed to get the full approval of the parents," Bishop Bellet said. "The doctor did not take time to explain to the father or mother the compelling reasons which necessitated removing the girl.—S.N.S. photo.

CARNIVAL PREPARATIONS—Workers paint some of the dummies for the 1938 carnival parade at Nice, France. That's the most famous carnival on the French Riviera and everyone works feverishly to get cars, dummies and masks all packed up for the big day.—S.N.S. photo.

CAUGHT IN THE ACT—Caught red-handed cracking a safe in a St. Catharines, Ont. store, Matthew Kolbus, left; Paul Mercer and Murray Overholt, right, are taken to cells by P.C. Les Winkley, who helped arrest them at gunpoint.—S.N.S. photo.

The Chemical Reaction Which Causes Cancer Still a Mystery

MEMPHIS, Tenn.—Even scientists don't know the secret of the chemical reaction which causes cancer.

Leading cancer research scientists and doctors attending the first National Cancer Conference have been trying to bring that mystery out of the laboratory into everyday life.

But to the average man, the question remains unanswered.

The experts have said that there are "over 200,000 new products" in use in the common use which cause cancer. But they don't know why cancer develops as a deadly, intractable 50 years ago. But today, it's caught in time, it can be cured.

From the writer of multi-syllable

words and scientific terms at this conference, it can be said that cancer is caused in two ways: by physical and chemical reaction.

For instance, cancer can cause skin cancer. This is a chemical reaction, but because of the long period it takes for the disease to appear—from 10 to 20 years ago—only in a few cases the cause and not discover cancer until it is too late.

According to Dr. Austin V. Delbert of the U.S. Public Health Service's National Cancer Institute, "this cancer is more prevalent in the south than in the north." The supposition is that people in the south are more exposed to sunlight. But Delbert was optimistic.

Other remarks were applied early enough, skin cancers—whose incidence showed five per cent of the entire cancer problem—are easy to cure.

Among other things which are known to cause cancer are all color broths, even-spice broths, and even some eyes, such as butter.

This coal-gas line has led to considerable argument over whether tobacco causes cancer. You can get cancer from tobacco, but not from the smoke.

Other experts said that asbestos, automobile exhausts, the smoke of kites and certain road surfaces are "suspected" of causing the disease.

The American Medical Association's committee has suggested that even "skin reagent" may be a cause of cancer.

But with the prediction that cancer deaths will double in the next 10 years, the committee has urged that "why" remains unanswered.

While the cancer specialists get finished here, they don't expect to have a word to say about the average man and woman, unless they wait in line.

And what can you do? You can't. The average man and woman, unless they wait in line.

How's that? Well, the average man and woman, unless they wait in line.

And what can you do? You can't. The average man and woman, unless they wait in line.

How's that? Well, the average man and woman, unless they wait in line.

These declarations, so sinister by implication, are obviously inspired from a common centre. The men who made them, living as citizens subject to their country's laws, are simply traitors and should be treated as such.

FREEDOM'S DESTINY

The two-headed god Janus stood at the gates of Rome, looking both forward and backward. But the barbarians stormed the towers of the city just behind him, and tore down the pride and glory of the ancient world.

Many who stand like Janus looking back on the past and forward to the future are filled with misgivings lest man unwittingly step over the threshold to another dark age for civilization.

For revolution, hatred, war and death are grim realities in many parts of the world. The past War in 1914? This is still a question in the minds of many. But they mistake the issue. World war has already been declared. In some places it has long ago reached the shooting stage. In others, it is still in the shooting stage. But all over the world it is no longer in doubt that 1949 is going to be a year of increasing ideological strife.

The organized forces of materialism have long studied and understood the question of ideological warfare. Therefore, the materialist has been to create a world atmosphere of division and unrest in which they can effectively achieve their strategic objectives, one by one. Today, they threaten to win in all out bid for world domination.

The democracies, by contrast, have been innocent and amateurish in ideological understanding. We in Canada need immediately to turn our attention to this urgent question. We have still to develop an adequate ideological offensive to match our military and industrial strength.

Three steps we in Canada must take, in preparation for the struggle which undoubtedly lies ahead.

1. We must find an ideology to which we can give any of the issues which will be the focus of ideological warfare.

2. We must study the principles of ideological warfare.

3. We must begin to live the moral ideology of freedom which is based on absolute standards of honesty and selflessness, and apply it to every part of personal and national life.

—The World News Agency

Mr. and Mrs. M. G. Wallace from Ottawa, Ontario, arrived on Saturday last to spend a couple of weeks with Mr. and Mrs. Ed. Desroze. Mr. Wallace is Mrs. Desroze's sister.

Mr. and Mrs. Fred Holland and Mr. and Mrs. Thos. Ridley were called out from Calgary last Friday evening, owing to the serious illness of Bert Holland, who is a patient in Drumheller hospital.

Mr. and Mrs. A. Dick and daughter, Carol, and Mrs. Art Nelson were visitors at the Dick home in Delta Thursday evening.

Mr. and Mrs. Jack Tough returned from Victoria recently, and were guests at the home of Mr. and Mrs. Percy Robinson on Sunday.

Mr. E. L. Long was a business visitor to Stettler recently.

Mr. and Mrs. Douglas Granville went into Calgary on Friday last, to attend the Bull Sale. The Douglas took two bulls into the sale.

Thos. Hadeland, from Kindersley, Sask., was a visitor at the Nelson home last Monday evening.

The Leisy family, from Drumheller, were visitors in this district last Sunday.

Calgary visitors during the week were: Mr. and Mrs. E. M. Herman, Ray Nelson and Ken Rosine.

Ellis Gostling spent last week with Mr. and Mrs. Walter Ponflier, of Morris.

Random Notes

Was his face red!

We are indebted to our contemporary, The People's Weekly, for the following:

"The newly appointed Minister of Agriculture, the Hon. David Lewis, M.L.A. from Red Deer, received a most verbal spanking from A. J. E. Liesemer (C. C. F. Calgary), in the course of the latter's remarks on the Throne debate on Monday.

"After frequent interjections and interruptions from the Minister, the Calgary member finally stopped in the middle of a sentence and commented: 'Mr. Speaker, the honorable member from Red Deer has just been promoted to cabinet rank. During his days as back-bencher he constituted himself the No. 1 leader of opposition speakers. Someone should tell him, sir, that he's a big boy now and can leave calls to somebody else. Indeed, for the sake of the decorum of the house, it would be as well if the Premier would take the Minister quietly aside and give him a little talk, kindly but firm, on the subject of how to behave like a Cabinet Minister.'

The news that Mr. J. L. Lewis has instructed union men to shut down work in eastern Canada for two weeks as a protest against the appointment of Dr. James Boyd to the post of U.S. Chief of the Bureau of Mines, is another illustration of the intention among powerful labor leaders to endeavor to influence government appointments with which they are in disagreement by threat and boycott.

A few months ago, a somewhat similar incident occurred in Britain, when Mr. Fred. Horner, head of the Transport union, warned Prime Minister Attlee not to remove Edmund Shinwell from his post as Minister of Mines. To the credit of Mr. Attlee, this arrogant ultimatum was completely ignored and Mr. Shinwell continued on to another and, presumably, more useful sphere.

It could be, that by making representations in a quiet quarter, Mr. Lewis' objections might be given consideration without the action wide publicity of a coal-strike. But this would be far to hide one's light under a bushel of course.

Yet by adopting the more beligerent method, the action of the miners' leader may only lead to the strengthening of those

who are opposed to amendment of the Taft-Hartley labor law.

Speakers of Parliament are impartial judges. But not when it comes to Hagbia. Like the weather, every body has an opinion on it.

The other day one of the members mentioned British sausages. He described them as something in casings that tasted very much like a mixture of oatmeal and mardur. "Although I'm quite sure it was not oatmeal," one member suggested "haggis."

He replied that he had tasted haggis recently, and was sure it was not oatmeal."

A shout of "Order" came from the Speaker's chair. The members grinned. It was Deputy-Speaker W. Ross MacDonald.

RUMOUR DENIED

A statement published last week, that what had been declared a surprise community in the United States, has been denied by the official of the Department of Agriculture in that country.

A measure of this kind would have been a blow to the marketing of Canadian wheat, since dollars allocated to Britain, would have to be expended for purchases of United States wheat under such a ruling.

Canada's Retail Business

Total retail sales in Canada in 1948 amounted to \$7,300,000,000, according to a report issued by the Dominion Bureau of Statistics. That figure is more than double the total retail sales in 1944, the last known year, and eleven per cent higher than sales in 1947.

No Commercial Basis

J. E. Birdall, Alberta supervisor of crop improvement, says there is little prospect of Alberta farmers being able to produce on a commercial basis such oil yielding crops as sunflowers, soybeans and Argentine rape. Oils from such crops may be used in the production of margarine.

New Seed
Is The Best

"New seed is the best" is a piece of advice given around 300 B.C. by Theophrastus, a noted agricultural authority in ancient Greece. Theophrastus had noted that the seed selectors of old, who corresponded to modern plant breeders, were continually selecting new strains of seed which greatly improved the yield and quality of field crops.

The newest and best seed obtainable today is Registered seed. The use by any farmer of a few bushels of Registered seed will be found to be an investment that will bring him higher grades, higher yields, and so increased income.

TIME BOMBS

Civilization will become a force unless Christianity becomes a force.

A clever mind sees the problem. An understanding heart supplies the answer.

Democracy does not depend on who you elect to rule, but on how you elect to live.

The public life of any nation depends upon the private lives of those who run it.

Your banker works
For You

As a depositor or borrower, you value privacy in money matters. Your banker protects that privacy. Your banking transactions are not open to the eyes and ears of your competitor, your neighbor, your community.

In other words, the manager of your branch bank and his whole staff are working for you.

Contrast this Canadian way with conditions in lands where freedom is denied—where every bank is a political tool, every banker a public official working for the State! State monopoly of banking, proposed by Socialists here, would open your banking transactions to political intrusion.

CALLING A SPADE A SPADE

Prime Minister St. Laurent is to be congratulated on his outspokenness of Saturday last when he declared that any affirmation by Canadian Communists, similar to that made in other countries, will be dealt with as treason.

The fact that in Italy, France and Britain Communist leaders have been allowed to freely declare their intentions of aiding the U.S.S.R. in any quarrel that may occur between their own country and Russia, is either an indication of the strength of Communism in those countries, or of the weakness of the men comprising their government.

To the average citizen of a democratic country, freedom of speech has been generally accepted as the right to criticize any or every government that attains power; even to work for its downfall—within the limits of constitutional propriety.

However, this is very different from the attitude displayed by these Communists.
